TELECOMMUNICATIONS AND RADIO ENGINEERING

CONTENTS FOR 1991

NUMBER 1

Page

PART 1
TELECOMMUNICATIONS

K.A. Meshkovskiy and A. Yu. Rokotyan: Restoration of Communications Network Connectivity Following the Failure of Transmission Junctions and Lines..... 1
V.O. Ignat'yev, M.O. Kolbanev and Kh. F. Kishiyev: Numerical Analysis of Call Servicing Quality at a Program-Controlled Switching Function..... 6
Yu. K. Kalintsev: Estimate of the Information Content of Speech Signals Based on Modern Speech Analysis..... 11
S.N. Sobolev: Estimation of Speech Signal Transmission Quality from Measurements of Its Spectral Dynamics..... 16
A.A. Berestetskiy and T.V. Gubanova: Synthesis of a Sampling Frequency Reduction System for a Digital Receiver Recorder..... 21
A.M. Sinil'nikov: Orthogonal-Transformation Band Coding of Audio Signals..... 25
V.M. Shed'ko and V.G. Khodatay: The Efficiency of Audio Signal Companders Employed on Transmission Channels..... 28

PART 2
RADIO ENGINEERING

INFORMATION AND COMPUTER NETWORKS IN RADIO ENGINEERING SYSTEMS AND COMMUNICATIONS SYSTEMS

A.M. Gortsev and I.S. Klimov: Estimation of Intensity of Poisson Stream of Events for Conditions under Which It is Partially Unobservable..... 33
S.A. Pottosina and A.F. Terpugov: Filtering of Two-Fold Stochastic Recurrence Point Processes..... 38
I.A. Korotayev and N. Yu. Margolis: Calculation of Characteristics of Local Token-Access Networks..... 44
R.S. Mostinskiy: Model of Station of Data Communications Network with Instantaneous Random Access to Channel..... 48
A.M. Gortsev and N.F. Barannik: Maximum Likelihood Estimate of Parameters of Two-Fold Stochastic Poisson Stream of Events..... 51

RADIO ENGINEERING

INFORMATION AND COMPUTER NETWORKS IN RADIO ENGINEERING SYSTEMS AND COMMUNICATIONS SYSTEMS

A.M. Gortsev and I.S. Klimov: Estimation of Intensity of Poisson Stream of Events for Conditions under Which It is Partially Unobservable..... 33
S.A. Pottosina and A.F. Terpugov: Filtering of Two-Fold Stochastic Recurrence Point Processes..... 38
I.A. Korotayev and N. Yu. Margolis: Calculation of Characteristics of Local Token-Access Networks..... 44
R.S. Mostinskiy: Model of Station of Data Communications Network with Instantaneous Random Access to Channel..... 48
A.M. Gortsev and N.F. Barannik: Maximum Likelihood Estimate of Parameters of Two-Fold Stochastic Poisson Stream of Events..... 51

Page

ELECTRONIC CIRCUITS AND DEVICES

V.A. Polyakov and R.G. Tolparev: Multiple-Input Nonparametric Detector..... 62
Yu. I. Chernyshov: Dynamic Range of High-Order Active Filters..... 65
S.L. Abramov and A.P. Kuznetsov: Phase Locking of Temperature-Controlled Low-Noise Microwave Oscillator..... 70
M.V. Blagoveshchenskiy and Ye. P. Leonicheva: Ambiguous Regimes of Single-Loop Self-Excited Oscillators..... 73
B.M. Bogdanovich: Invariance Principle and Prevention of Nonlinear Signal Loss in Receiver-Amplifier Channels..... 76
I. Yu. Bakalenko, M.N. Bogdanov and Ye. S. Krasnov: Nonreciprocal Microwave Power Divider. 80
V.V. Prilepskiy and A.M. Savvinov: Estimate of Parameters of Discrete Component of Signal and Noise Mixture at Output of Remodulator..... 82

SIGNAL PROCESSING

A.L. Deych, S.L. Portnoy, A. Ye. Tuzkov and D.A. Florkovskiy: Optimization of Concatenated Codes with Respect to the Criterion of a Minimum Error Probability in Word of External Code..... 85
O.V. Ampilov and V.N. Garmash: Detection of Several Closely Spaced Signals in Background of Nonsteady-State Noise with Unknown Distribution Parameters..... 88

ANTENNA-WAVEGUIDE TECHNIQUES AND RADIO WAVE PROPAGATION

Kh. I. Derzhani: Effect of Interelement Coupling of a Phase Antenna Array on Its Characteristics..... 91
V.S. Filippov and D.V. Tatarnikov: Characteristics of Laminated Emitters with a Transversely Nonuniform Substrate in a Regular Phase Antenna Array..... 95
V.A. Kolomeytsev and V.V. Yakovlev: The Bandwidth of Microwave Equipment for the Heating of Thermoparametric Materials Based on Waveguides of Complex Cross Section..... 98
E.A. Mal'tsev: Simplification of the Calculations of a Focusing Matrix for a Linear Equidistant Antenna Array..... 101
Yu. P. Akulinichev: The Transfer Constants of a Transhorizon Tropospheric Link in the Case of Motion, Scanning, and Spacing of the Antennas..... 103
I.M. Teplyakov: The Effect of Rain on the Attenuation of a Radio Signal in Space Radio Links.... 107

OPTICAL METHODS IN NEW INFORMATION TECHNOLOGIES

V.V. Rozdobud'ko: Series-Type Acousto-Optic Microwave Frequency Meter..... 111
S.V. Stoyanov: Fundamental Models of Noncircular Nonuniform Anisotropic Fiber Lightguide..... 116

FOR THE ENGINEER

S.P. Plekhanov: Functionally Complete Set of Universal Triggers on Nontraditional Types of Logic..... 118
Yu. A. Nemlikher, A.F. Rukavitsyn, Ye. L. Kryakov and I.A. Strukov: Octave Transformer of Impedances Employing LC Elements..... 120

Page

EXTENDED ABSTRACT

N.D. Malyutin: Synthesis of Coupled Strip Lines on a Suspended Substrate in Terms of Specified Capacitances..... 124
N.N. Klimenko and S.V. Klimenko: Statistical Principles of Locating Radio Emission Sources by Phase Method..... 125
O.N. Maslov: The Field of a Dipole Emitter of a Stationary Noise Signal..... 126

NUMBER 2

PART 1
TELECOMMUNICATIONS

E.D. Poborchiy: The "Raduga-2" Radio-Relay Equipment..... 1
I.S. Braynina: A Method of Designing Adaptive Group Digital Multichannel "Two-of-Six" Code Receivers for PCM Signals..... 8
M.A. Zharkov, V.A. Naumov, N.K. Poroshkov and K.E. Samuylov: Estimation of the Average Call Connection Time in an Integrated Services Digital Network..... 15
Yu. A. Alekseyev, V.A. Biryukov and M.N. Koltunov: Digital Network Synchronization Equipment..... 20
Yu. P. Ivanov, A.B. Tikhonovich, S.V. Abramov, V.F. Utkin and B.I. Shlyuger: The SATsK-2/SK-30 Baseband Equipment with Analog and Digital Terminations for Digital Transmission Systems..... 24
L.N. Gurvich and V.F. Zenkin: Signal Transmission at 480 kibits/s Over Primary Digital Network Channels..... 28
A.I. Lazorenko and V.V. Yarovoy: A Modem for 64 kbits/s Signal Transmission Over an Urban Network..... 32
V.G. Bondarenko and M.G. Shnayderman: The Lower Level of the Automated Technical Operations System of a Primary Digital Network..... 36
V.B. Kozyrev, L.V. Vlasova and E.N. Novikova: Input AFR Correction Circuits for Transistor Quadrature Power Amplifiers..... 42

PART 2
RADIO ENGINEERING

RADIO-ELECTRONIC SYSTEMS UNDER CONDITIONS OF INTERFERENCE AND COUNTERMEASURES

Yu. S. Sukhorukov and V.M. Shlyakhin: The Principles of Modeling the Infraction Dynamics of Opposing Sides Under Radar-Conflict Conditions..... 47
V.V. Bykov: The Capabilities of Modern Radar Under Conditions of the Combined Use of Stealth and Noise Jamming Techniques..... 54
V.G. Radziyevskiy and V.M. Shlyakhin: The Features of the Combined Use of Masking and Deception Jamming Under Conflict Radar Conditions..... 60
V.G. Radziyevskiy and A.A. Sirota: Basic Statistical Models of Electronic Surveillance in Radar Countermeasures..... 65
V.M. Shlyakhin and V.L. Karkotskiy: Estimation of the Advantage to Sides Under Conflict Radar Conditions..... 72
A.F. Fomin and A.V. Stafeyev: Approximate Identification of the Interference Distribution in Adaptive Receivers..... 76

Page

S.V. Valov: The Effect of Signal Ensemble Size on the Noise Immunity of a Communications System Under Structured Jamming..... 82

RADIO ELECTRONIC CIRCUITS AND DEVICES

A.N. Sidnev: Clock Synchronization Devices for High-Speed Receivers..... 86
F.I. Khaytun, S.A. Rasskazov and R.B. Shemshedinov: Optimization of the Width of the Radiation Pattern of an Optical Rangefinder for Oblique-Incidence Ground Ranging..... 92
I. Yu. Bakalenko, M.N. Bogdanov, A.A. Dimitryuk and Ye. S. Krasnov: Microstrip Circulators Based on Coupled Lines..... 95
I.B. Rogozhkin and M.S. Chernyakov: The Characteristics of Digital Filters with Random Changes in the Sampling Period..... 97

SIGNAL PROCESSING

I.V. Steklov: The Generation of Complex Signals Keyed by Welty Codes..... 100
M.N. Yatsimirskiy: A Rader-Brenner Fast Hartley Transformation..... 106
Yu. V. Cheprukov and M.A. Sokolov: Problems of Synthesizing Generalized Composite Signals... 111

ANTENNA-WAVEGUIDE TECHNIQUES AND RADIO-WAVE PROPAGATION

V.V. Savchenko and D.N. Bashulin: The Effect of Antenna Array Geometry Distortions on the Effectiveness of Estimates of the Spatial Power Spectrum by Means of the Entropy Minimax Method..... 116
V.A. Kaplun and V.M. Zelenkevich: The Application of Random Search Methods to the Design of Radio Transparent Radomes..... 120
V.V. Kozlovskiy: The Surface Impedance in an Iris-Loaded Waveguide..... 123

UNPUBLISHED PAPERS

V.B. Braude, Yu. V. Vaysleib and V. Yu. Sankovich: Investigation of the Directional Properties of a Conical Horn in Various Cases of Single Mode Excitation 126
O.B. Lishtayev, A.I. Luchaninov, S.V. Tolstova and V.M. Shokalo: A Mathematical Model and Algorithm for Analyzing the Electrodynamic Characteristics of Wire Radiators of Complex Radiators of Complex Geometry..... 128

OPTICAL METHODS IN NEW INFORMATION TECHNOLOGIES

A.P. Kusaykiin, A. Ye. Poyedinchuk, Yu. K. Sirenko and V.P. Shestopalov: Two-Dimensional Inverse Problems of Wave Diffraction at Locally Nonuniform Dielectric Scatterers..... 130

FOR THE ENGINEER

A.A. Volkov: Increase of Efficiency of Multiple-Tuned Transformers..... 135
G.M. Krylov: Bandpass Amplifier..... 137
Z.S. Kalantarova: Investigation of Characteristics of Pulse Generator Employing AlGaAs p-n-i-n^+ Structure..... 139
V.P. D'yakonov: Calculation of the Harmonic Coefficient of Amplifiers by Means of the MathCAD System..... 142

Page

NUMBER 3

Part 1
TELECOMMUNICATIONS

I.P. Kozlyayev, L. Kh. Nurmukhamedov and G.A. Pavlovich, The Communications Link Equipment of the "Shelf-1" Deep-Water System..... 1
V.I. Lyutin, M.A. Mendel'son, B.S. Rybakov and M. Kh. Khasanov: The UPS-4224 Adaptive Digital Channel Conversion Equipment in the Analog Network of the Unified Automated Communications Network..... 6
S.S. Kogan: Technical Diagnostics and Automatic Redundancy in Digital Television Trunk Lines..... 13
Yu. M. Alimin, S.S. Litvak, A.M. Mishchenko and A.A. Rotenfel'd: Automation of Repeater Parameter Measurements in Digital Transmission Systems..... 20
A.V. Yakovlev, V.A. Mikhalylov and M.Z. Lyubovskaya: Tone-Frequency Channel Parameter-Monitoring Equipment..... 24
A.N. Bekrenev and V.N. Shiman: A Telephone Tone Number Dialing Monitor..... 28
V.E. Karpachev and V.L. L'vov: Elementary Section Node Calculation Algorithm for Estimating the Structural Survivability of a Communications Network..... 31

PART 2
RADIO ENGINEERING

RADIO SYSTEMS

G.V. Gorelov and M. Kintana: Level Quantization in Statistical Multiplexing of a Digital Transmission System..... 35
O.A. Shorin and M.V. Fedulov: Packet Data Transmission in Multichannel Mobile Radio Communications Systems..... 38

RADIO CIRCUITS AND DEVICES

R.I. Rumyantsev: A Corrector for Reducing Electromagnetic-Field Measurement Error..... 42
Ye. A. Volkov and N.D. Pirogova: Modeling of Radio Receiver Circuits with Feedback..... 45
A.R. Sheykin: A Matrix Algorithm for Synthesizing Digital Recursive Filters..... 49

SIGNAL PROCESSING

I.P. Babenko: Optimal Noncoherent Reception of Minimum-Shift FSK Signals..... 53
V.I. Priklonskaya: Modeling of the Effect of Aircraft Trajectory Instabilities on the Characteristics of a Synthesized-Aperture Antenna..... 61
L.M. Gel'man: Estimate of the Amplitude Modulation Factor of Noise by a Random Signal..... 65

ANTENNA-WAVEGUIDE TECHNIQUES AND RADIO-WAVE PROPAGATION

L.V. Kolosov and V.V. Kulikov: A Method of Forming a Radiation-Pattern Null in a Phased Antenna Array..... 68
V.K. Lipskiy: Calculation of the Parameters of a Broadband Active Magnetic Antenna..... 73
Yu. A. Khitrov: A Switched Microstrip Antenna..... 76
I.V. Golovin and G.A. Polukhin: The Radiation Pattern of a Spatially Excited Circular Antenna..... 80
I.L. Kalyuzhnyy and V.V. Fidelis: Estimate of the Noise Immunity when Radio Stations Operate into a Common Antenna..... 82

Page

A.S. Afromeyev, V.A. Kappun and I.A. Naumov: A Controlled Microwave Power Divider..... 84
A.V. Gureyev: Modes in a Screened Dielectric Waveguide..... 87

OPTICAL METHODS IN NEW INFORMATION TECHNOLOGIES

B.S. Kiselev, N. Yu. Kulakov, A.L. Mikaelyan and V.A. Shkitin: An Optical Autoassociative and Heteroassociative Memory for Strongly Correlated Patterns..... 90
L.I. Litinskaya and N.V. Radygina: Induced Changes in the Transmission Spectra of Optical Recording Media Based on Chalcogenide Glasses..... 99
D.V. Igumnov and V.A. Maslovskiy: The Threshold Voltage of Power MOSFETs..... 101
V.M. Nalbandyan and E.G. Bagdasaryan: The Design of Small-Signal Microwave Amplifiers..... 103
V.N. Sretenskiy: The Electromagnetic Spectrum and the Characteristics of Physical Experimentation in Radio Engineering and Electronics..... 106

UNPUBLISHED PAPERS

Yu. G. Bulychev, I.V. Burlay and V.A. Motorkin: Kalman Filtering Equations for Pseudotriangulation Radar Systems..... 112
I. Yu. Malevich and K.L. Gorbachev: Optimization of the Intermodulation Characteristics of Broadband Matched Amplifier Circuits in a Lumped Parameter Basis..... 115
V.G. Ivanova: Realization of Digital Sine-Cosine Resolvers in a Signal Processor..... 117
N.A. Litsarev: The Noise Immunity of Quaternary PSK, Offset PSK, and Minimum-Shift PSK Signal in a Band-Limited Channel with a Nonlinear Repeater..... 119
A.M. Makarov and S.A. Marzoyev: Investigation of a Discrete Mellin-Transform Algorithm..... 120
I.L. Korolev: A Method of Generating a Pulsed Nonequidistant Sequence..... 122
D. Sh. Agrba and V.I. Yesipenko: The Error Probability when Receiving a Signal Distorted by Multiplicative Interference..... 124
I.A. Zharkikh and V.V. Kretinin: Binary Recognition of Stochastic Signals with Preliminary Aperture Compression..... 125
O.N. Maslov: The Spectral Characteristics of the Field of a Dipole Radiator of a Stationary Noise Signal..... 128
A.N. Kulikov and A.L. Magazinnikova: A Mathematical Model for Calculating the Mean Attenuation of an Ultrashort-Wave Field in a Forest..... 130

NUMBER 4

PART 1
TELECOMMUNICATIONS

I.V. Sukhodoyev and A. Yu. Gryzin: Estimation of Interference Taking into Account CCITT Recommended Transmission Factors..... 1
Yu. L. Bystrov, S.A. Lomashevich and Yu. V. Svetikov: An Optical Transistor: A New Functional Element in Fiber Optic Transmission Systems Techniques..... 6
T.V. Basistova, T.N. Vashchenko and A.L. Dmitriyev: Compact IR-Objectives for Fiber-Optic Transmission and Data Processing Systems..... 12
A.A. Akimov, A.M. Anosov, G.S. Gusakov, A.V. Kolesnikov and L.A. Sakhnin: Analysis of the Radio Visibility Zones of Satellite Communications Systems Employing Satellites in Various Orbits..... 15
I.S. Fal'kovich: The Attenuation of Polarization Fading in the Ionospheric Propagation of Decameter Waves..... 20

Page

V.N. Zakharenko: The Effect of Variations in the Electrical Conductivity of the Underlying Surface on the Amplitude of a Ground Wave in the Medium- and Long-Wave Bands..... 26
V.N. Abarykov, V.K. Alekseyev and I.G. Afanas'yev: The Pulse Response of Urban Radio Channels in the VHF Band..... 30
D.L. Tamm, D.A. Tkachenko and A.A. Shipitsyn: A Single-Sideband Signal Amplifier with Stepped Regulation of the Plate Supply Voltage..... 36
V.N. Kotlyarov: The Features of a Power Calculation of Tube Oscillators with a Rapidly Varying Load..... 38
N.I. Krivoruchko: Some Problems of the Operation of Two Identical Controlled Oscillators on a Converter..... 41
O.P. Zhdanov, F.A. Shaymardanov and V.I. Shatalov: Digital Narrowband Filtering with Low Sampling Errors..... 45

PART 2
RADIO ENGINEERING

RADIO SYSTEMS

Ye. I. Glushankov and V. Ya. Kontorovich: The Construction of Markov Models of Non-Gaussian Vector Random Processes Describing the Parameters of Signals in Antenna Arrays..... 49
Ye. I. Glushankov, M.L. Dotsenko, V. Ya. Kontorovich and S.V. Kobin: Modeling of Partially Coherent Signals in Adaptive Arrays Using Linear Stochastic Differential Equations..... 57

SYNTHESIS OF SPACE-TIME SIGNAL-PROCESSING ALGORITHMS

S.V. Kobin: The Use of the Ψ-Transformation Method for Adaptive Space-Time Signal Processing..... 64
V.S. Yefimenkov and V.N. Kharisov: Optimum Filtering Algorithms for Spatial Multichannel Reception Under Conditions of Rapid Variations of the Signal-Interference Situation..... 67
V.A. Zhirov: An Adaptation Algorithm for an Antenna Array..... 72
Ye. I. Glushankov, V.I. Zimarin, V.R. Misyura and V.A. Rodimov: Space-Time Signal Processing Under Conflict Conditions..... 76

ANALYSIS OF THE CHARACTERISTICS OF SPACE-TIME SIGNAL PROCESSING ALGORITHMS

S.V. Kobin and L.A. Marchuk: Analysis of the Properties of Objective Functions in Adaptive Space-Time Signal Processing Problems..... 79
Ye. I. Glushankov, A.N. Kolesnikov, V.I. Motkov and V.A. Rodimov: Approximation of Sample Correlation Matrices of a Special Type in Problems of Adapting Centrally Symmetrical Antenna Arrays..... 83
S.V. Kobin, L.A. Marchuk and V.A. Rodimov: Features of Adaptive Space-Time Signal Processing in the Case of Nonconvexity of the Objective Functions 92
L.A. Marchuk and V.V. Fattakhov: Analysis of Adaptive Antenna Array Control System Stability.. 94

SPACE-TIME PROCESSING OF BROADBAND SIGNALS

Ye. I. Glushankov, A.N. Kolesnikov and V.V. Ushakov: Space-Time Processing of Signals with PTOF in Satellite Communications Links with Moving Vehicles..... 98
N.A. Gusev, S.V. Kobin and V.A. Rodimov: Adaptive Space-Time Processing of Broadband Signals in Radio Communication Links with Moving Vehicles..... 104

Page

V.S. Yefimenko: Optimum Discrimination Characteristic of Orthogonal Multiposition Signals in the Case of Spatial-Multichannel Reception..... 107

THE USE OF SPACE-TIME SIGNAL PROCESSING IN RADIO SYSTEMS DESIGNED FOR VARIOUS PURPOSES

A.V. Dolmatov and L.M. Konovalov: The Use of Complex Space-Time Signals in Radio Communications Links to Ensure Electromagnetic Compatibility..... 113
Ye. I. Glushankov and V. Ya. Kontorovich: Analysis of EMC in Radio Communications Systems with Space-Time Signal Processing..... 117

IMPLEMENTATION OF SPACE-TIME SIGNAL PROCESSING ALGORITHMS

V.S. Yefimenko and S.A. Sergeyev: The Implementation of an Optimum N-Alternative Signal Discrimination Algorithm for Spatial-Multichannel Reception..... 122
Information on the Authors..... 127
Listing of Exhibitions Planned for 1992..... 129
From the Editorial Board..... 130

NUMBER 5

PART 1
TELECOMMUNICATIONS

N.N. Bazhenov: Prediction of the Reliability of a Digital Transmission System..... 1
V.N. Korshunov: Methods of Estimating and Improving the Efficiency of Optical Communications Cables..... 6
Z.D. Lerner: Optimum Synthesis of Frequency Channels for Digital Data Transmission..... 16
A.S. Adzhemov, G.P. Basharin, A.V. Bizin and B.E. Kurenkov: Methods of Distributing the Carrying Capacity of a Digital Switching Field Between Narrowband and Broadband Calls..... 23
V.K. Lipskiy and A.E. Moshinskiy: Matching of a Loop Antenna to an Amplifier over a Frequency Band..... 28
I.G. Sharonov and V.P. Peskov: Application of the Efficiency Retention Factor to the Design of Radio-Communications Systems..... 32
S.M. Shirokov: The Statistical Characteristics of Soliton Optical Communications Systems..... 36
S.L. Makarenko and V.I. Shchitnikov: An Algorithm for Synthesizing Multilevel Balanced Block Codes for Digital Cable Line Channels..... 41
V.A. Gladyshev: An Amplitude Discriminator with a Stabilized Threshold..... 47
Ye. A. Glukhov: A Quasienergy Estimate of Acoustic Radiators..... 50

COMMUNICATIONS NETWORKS

V.S. Skvortsov: An Estimate of the Reliability of a Multipath Communications Network..... 52

RADIO BROADCASTING

N. Isayev, V.G. Dotolev, O.I. Sergeyev and A.T. Titov: A Method of Increasing the Utilization Efficiency of HF Bands Allocated to the Radio Broadcasting Service..... 58
E.R. Gut, A.M. Utkin and A.A. Berestetskiy: Modeling the Channel of a Digital Radio Broadcasting System..... 62
S.A. Chekcheyev: A Radio-Broadcasting System Employing Linear Amplitude-Phase Modulation.. 67

Page

K.V. Borisov and V.V. Korovkin: The Use of Optical Reflectometry to Predict the Operating Reliability of Optical Cables..... 71
P.V. Bazakutsa, V.B. Katok and G.P. Levchenko: The Effect of a Splitter on the Quality of Duplex Communications Over a Single Fiber Lightguide..... 74

COMMUNICATIONS SYSTEMS AND NETWORKS. DIGITAL DATA TRANSMISSION

V.P. Koryachko: Models of the Control of Flows of Information in Communications Networks..... 79
L.P. Korichnev: Statistical Procedures of Sequential Analysis of the State of Digital Communication Channels..... 83
A.N. Pyl'kin: Adaptive Control in Digital Data Transmission Systems..... 87
V.E. Boltnev: A Numerical-Analytical Method of Estimating the Reliability of Systems with Sliding Standby..... 92

SIGNAL AND IMAGE PROCESSING

V.K. Zlobin and V.V. Eremeyev: Normalization of Videodata in Remote Sensing Systems..... 97
E.M. Dondik: Interzonal Analysis of Images Using Multidimensional-Matrix Structures..... 102
S.A. Suslonov: A Phase-Structure Method of Compressing the Spectrum of a Television Video Signal..... 107
E.P. Churakov: The Method of Orthogonal Representations in the Problem of Simultaneously Establishing an Irregular Pulse Train and Estimating an Unknown Background..... 113
D.I. Popov: Determination of the Time Position of a Train of Coherent Pulses..... 118

CIRCUIT THEORY AND FILTERS

V.V. Vityazev: The Optimum Design of Multistage Digital-Filter Structures Using Signal Processors..... 121
Yu. M. Suslov and V.I. Ryazanov: Approximation of the Amplitude-Frequency Characteristic of a Bandpass Filter Taking Component Losses into Account..... 130
V.A. Kazakov: The Effect of Random Pulsed Interference on a System of Two Filters..... 133
A.M. Berkutov, E.M. Proshin and G.A. Sadovskiy: Methods of Measuring the Errors of Digital Oscilloscopes and Recorders..... 137

COMPONENTS AND CIRCUITS

Yu. I. Sudakov: A Theoretical Analysis of the Power Relations in High-Power Quartz Composite-Transistor Self-Excited Oscillators and Generators..... 141
L.I. Zakhar'yashchev and V.I. Beidin: A Method of Comparing Circuit Forms of Self-Excited Oscillators for Transducers of Physical Quantities with a Frequency Output..... 153

MEASUREMENT TECHNIQUES

V.A. Korotchenko, I.A. Milyukhin and S.L. Karpov: Measurement of the Pressure of Residual Gases in Sealed-Off High-Voltage Vacuum Switches..... 157
Yu. M. Korshunov: The Piecewise-Linear Approximation of the Calibration Characteristics of Measuring Instruments..... 160

Page

NUMBER 6

PART 1
TELECOMMUNICATIONS

Yu. A. Zingerenko and M.A. Plotkin: Standardized Transmission Equipment Utilizing the VOSP-480M Single-Mode Optical Cable..... 1

I.A. Lukin, M.I. Belyakov, S.F. Lebedev, V.D. Liferenko and Yu. V. Markov: Equipment for a Quinary Fiber-Optic Transmission System..... 8

S.F. Lebedev, V.D. Liferenko, I.A. Lukin, Yu. V. Markov and V.V. Mol'kin: An NRZ-L Signal Repeater for a 668 Mbit/S Transmission Rate..... 12

S.A. Kuritsyn, V.D. Liferenko and I.A. Lukin: Models of an Optical Fiber Transmission System Line Circuit..... 16

S.A. Mironov, S.P. Orobinskiy, A.I. Bogatyrev and A.V. Tsvetkov: A Fiber-Optic Pressure Sensor..... 22

I.A. Daurtsev, L.I. Kozlyayev, V.N. Makkaveyev and Yu. F. Fedorov: Optical Fiber Transmission Systems Employing Semiconductor Optical Amplifiers..... 26

V.K. Koshmak, V.I. Makkaveyev and Yu. V. Svetikov: Mathematical Modeling of Digital Optical Fiber Transmission Systems Operating at Rates of up to 10 Gbit/s..... 29

S.V. Levinzon: A Method of Improving the Output Characteristics of Electric Power Supplies..... 34

V.I. Gvozdev, S.V. Girich, I.N. Ponomarev and V.A. Sheletina: A Ribbed-Dielectric Transmission Line..... 37

M.S. Voytik: Analysis of the Processes in a Magnetic Amplifier Under Self-Saturation Conditions..... 40

O.V. Rychnikov: An Evaluation of the Economic Feasibility of Measures to Improve the Noise Immunity and Reliability of Information Systems..... 43

S.P. Belousov, V.N. Demin and A.P. Klochkov: An Improved Antifading Medium-Wave Antenna..... 50

Yu. N. Nosov: Antennas for Television Broadcasting on Adjacent Frequency Channels..... 58

A.A. Metrikin: A Waveguide Channel for a 2-GHz Band Radio-Relay Link with a Small Number of Channels..... 65

PART 2
RADIO ENGINEERING

SIGNAL PROCESSING

The Synthesis of Optimal Algorithms..... 70

M.S. Yarlykov and A.A. Bazarov: Integrated User Equipment for Satellite and Hyperbolic Radio-Navigation Systems..... 70

Yu. G. Bulychev, A.A. Korotun, A.P. Manin and V.A. Motorkin: Target Position Fixing Using Angle-Measurement Data From a Mobile Receiving Station..... 80

Yu. F. Korobov: Optimization of a Multichannel Communications System Employing Frequency Division of Asynchronous Signals..... 85

G.M. Bashin: Multialternative Invariant Detection of a Weak Fading Signal Against a Background of Stationary Interference of Unknown Intensity..... 91

A.N. Korolev, A.F. Kotov and K. Sh. Yaroshevskaya: Linearization of the Equations of Nonlinear Filtering..... 95

G.A. Sokolov: Minimax Filtering of Pulsed Phase-Code and Amplitude-Phase-Shift-Keyed Signals..... 98

Page

V. Artyushin, A.V. Andreyev and A.V. Kozhakov: The Noise Immunity of Complex Radio Signal Search Devices Based on Combined Surface-Acoustic Wave/Charge Coupled Device Structures..... 102
V.V. Piskorzh: Detection of a Signal with a Phase Jump..... 106
G.A. Alipatov and S.K. Romanov: Synthesis of an Optimal Phase-Locked Loop System Based on the Root Mean Square Criterion with a Weight Function..... 108

RADIO CIRCUITS AND DEVICES

A.N. Gordonov and I.V. Rezvaya: An Astatic Tuning-Duration-Optimized Pulse-Phase Automatic Frequency Control System..... 111
I.N. Gurevich and Yu. A. Nikitin: Synthesis of a Frequency Network with an Arbitrary Step..... 116

ANTENNA WAVEGUIDE TECHNIQUES AND RADIO-WAVE PROPAGATION

Ye. D. Lotkova and S.V. Kosyakin: A Microstrip Filter Based on Dielectric Resonators..... 121
R.K. Starodubrovskiy: Improving the Accuracy of the Calculation of the Impedance of Transmission Lines with a Complex Transverse Cross Section..... 125
V.D. Gusev and S.M. Golynskiy: The Criterion for a Normal Distribution of the Scattered Field in the Radiation Reception Zone..... 129

OPTICAL METHODS IN NEW INFORMATION TECHNOLOGIES

V.K. Yerokhovets, Y.V. Larchenko and A.M. Leonov: The Speed of an X-Y Piezoceramic Light Deflector..... 133

NUMBER 7

PART 1
TELECOMMUNICATIONS

Yu. V. Pimenov and A. V. Yampol'skiy: A Method of Improving the Directional Properties of Decameter In-Phase Antennas Using Passive Dipoles..... 1
V. Yu. Yepanechnikov: A Family of Compatible Television Picture Coding Methods for Digital Picture Transmission Systems..... 4
Yu. V. Voronkov: The Generation of an AM Oscillation with Low Nonlinear Envelope Distortion and Low Attendant Angle Modulation..... 10
Yu. A. Bryukhanov: Control of the Duration of the Transients in a Digital Phase Locked Loop System..... 13
V.L. Bykov, G. Kh. Pan'kov, V.S. Rabinovich, M.M. Simonov, O.S. Tikhonov, D.A. Fedorov and V.M. Tsirlin: The Possibility of Constructing a Universal Digital Channel Group..... 17
R. Dimova and V. Khristov: A Method of Increasing the Carrying Capacity of Digital Line Channels..... 23
D.K. Mazurenko: Line Signal Coding Methods in Interacting Single-Cable Digital Transmission Systems..... 28
G.M. Mikirtichan and V.N. Grishin: The IU-1-10 Broadband Level Meter..... 33
I.I. Teumin: The Frequency Response of a Monomode Optical Fiber..... 38
